Advantages of OfficeNow for Business

VOIP2320 OfficeNow allows your business to make phone calls using the same broadband connectivity you use to connect to the Internet.

Phone system functionality is hosted on VOIP2320's private, redundant nationwide network. VOIP2320 provides IP phones, calling plans, and advanced calling features to create a unified communications system – whether you have one office or multiple locations nationwide.

For businesses that currently rely on traditional premises-based phone systems, VOIP2320 OfficeNow offers significant cost savings, superior flexibility, and advanced functionality. With all these advantages and more, many businesses have held back only because they anticipate a challenging transition process. Fortunately, VOIP2320 takes the pain out of switching with a unique level of simplicity and convenience from sales and installation all the way through to ongoing customer support.

10 Ways VOIP2320 Makes it Easier to Switch

Making a change to your business communications system takes a bit of time and effort, but it doesn't have to be a hassle. With VOIP2320 on your side, there's never been a better time to give your business the advantages of OfficeNow for Business.

1. Easy purchasing experience – phone quote

VOIP2320's experienced Business Consultants can generate a complete quote for any business – even multi-site businesses – in just a few minutes. We'll work with you to select the right phone hardware. We'll help you transfer your current phone numbers. You can keep your existing broadband connection.

2. No phone system required

Because phone system functionality is hosted on VOIP2320's private network, there's no PBX, IP-PBX, Key or other costly phone system to buy and maintain. That's a huge savings in time and money, and it means that you'll never outgrow your system. All you need is a broadband connection, ip-phones provided by VOIP2320.

3. IP phones for all employees

The Yealink T-28P is a six-line office worker phone that delivers superb sound quality as well as wide range of features at just \$179.95 per phone.

4. Unlimited calling plans

VOIP2320's Unlimited Business Calling Plan eliminates costly and unpredictable long distance bills. Make as many calls as you want, nationwide (USA) and Canada, for just \$19.95 per month per phone.

5. Rapid deployment

VOIP2320's dedicated Installation Coordinators will work with your business to ensure a smooth transition process with no downtime. Your Hosted Voice system will be completely installed and configured in 10 to 30 days. No on-site technical work is necessary to set up your voice service. It can be as simple as connecting the VOIP2320-pre-configured IP-Phones to your network. Many times our system can even be installed next to your old phones and when ready the old phones can be removed.

6. Broadband choice and call quality

- Although you can choose to keep your existing broadband service, VOIP2320 can make some suggestions on choosing the best provider to provide QOS (Quality of Service) on the Broadband Connection and reliability. VOIP2320 also recommends a internet failover through their VOIP2320 4G LTE wireless service.

7. Intuitive management tools

Learning to administer a VOIP2320 OfficeNow system is quick and intuitive, with none of the hassles associated with on-site PBX or IP-PBX equipment. Because functionality is hosted on the VOIP2320 network, you can manage phone system features from any location through a secure and easy-to-use web portal. There's never any need for on-site maintenance, and scalability is limited only by your broadband capacity. You can move and change users instantly yourself or at no cost by calling or emailing VOIP2320's award-winning customer support team, and adding new employees is as easy as ordering and plugging in a new ip-phone.

8. Easy-to-learn features

In addition to all the basic features you expect – like Call Waiting, Call Transfer, and 3-way Calling – VOIP2320 OfficeNow includes advanced web-based features that can help your business stay flexible and competitive. VOIP2320 provides a library of concise online resources to help new customers begin using these features immediately to improve productivity and mobility. Popular features include:

- Find Me / Follow Me. Program your calls to ring to multiple phones, such as mobile numbers.
- Remote Office. Use a home or hotel phone for business, without giving out the number or paying long distance.
- Voicemail as Email. Simplify voicemail management by receiving voice messages in your email inbox.
- Voice Toolbar. Integrate voice service with your email and web browser for one-click dialing and call control.

9. Mobile and remote worker integration

If your business extends beyond the confines of a traditional office, VOIP2320 OfficeNow offers a turnkey system for keeping employees connected. With VOIP2320 Teleworker service, individual remote workers can join your unified business phone system simply by plugging pre-configured ip-phones into their broadband connections. Plus, advanced mobility features like Find Me / Follow Me and Remote Office ensure that employees who travel frequently or work from home occasionally are never out of reach.

10. Disaster recovery protection

Choosing a OfficeNow phone system is one of the easiest ways to protect your business from sudden disruptions, such as power outages and natural disasters. This is an automatic benefit due to the way OfficeNow works. Because functionality is hosted on VOIP2320's redundant nationwide network, your phone system will continue to function no matter what happens at your office. Callers never get a fast busy signal, voicemail remains operational, and lines can be forwarded to alternate phones in minutes.

Switch Now

OfficeNow is a Voice over Internet (VoIP) solution, and VoIP is the future. According to In-Stat, 42% of U.S. businesses have already deployed VoIP solutions in at least one location, and penetration is expected to increase to 79% by 2014. Most experts believe that businesses that don't make the switch now will be playing catch-up in a few years. There's simply no reason to wait. VOIP2320 OfficeNow lowers costs, simplifies management, and delivers advanced features that help your business work smarter and stay nimble.
